SMTH Management Course

Number of delegates: 6
Duration: 2 days
Location: Horsley Cross

Who should attend

This course is designed for Signalling Managers who are responsible for SMTH staff.

The course contains principles of the SMTH, requirements of the SMTH tester and what is expected of SMTH Management staff.

Objectives

On successful completion of the training course the delegates will be able to:

- Outline the requirements for people required to manage SMTH staff
- Summarise the key principles as set out within the SMTH
- Indicate the role of the Section Manager and their responsibilities in relation to SMTH
- Examine test plans to ensure they comply with Health and Safety and other relevant regulations and guidelines
- Review all planned activities and ensure they adhere to the approved testing sequence and highlight any concerns
- Examine paperwork associated with the completion of testing
- Analyse site testing records
- Administer SMTH testing using the web portal, where applicable
- Administer SMTH testing using paper test logs and associated forms
- Analyse faults in accordance with SMTH, make formal decisions for next steps and be able to investigate faults reported
- Record reportable events in line with SMTH

Learning approach

The course is conducted between the hours of 08:45 and 15:30.

The course will be delivered with PowerPoint presentations, a mixture of scenarios and proactive learning techniques.

The course includes a written theory test which the individual must successfully complete as well as continual assessment throughout the course.

Pre-requisites

The delegate would ideally have previously held or currently hold SMTH competences. They should have management skills and be able to demonstrate how they currently manage staff.
