G110 Tester and Lead Tester

Number of delegates: 6
Duration: 2 days
Location: Horsley Cross

Who should attend

This course is designed for existing SMTH testers with SFI or Signalling Works Testers with operational experience. The course will enable the delegate to undertake the role of a G110 Tester or Lead Tester as defined within NR/L2/CTM/012/055.

Objectives

On successful completion of this course delegates will be able to:

- Describe the requirements of a G110 tester/lead tester
- Determine where they can obtain information from regarding the nature and scope of the work
- Highlight which specifications, reports, engineering drawings, diagrams, manuals and any relevant materials are required for the work
- Complete test documentation and demonstrate an understanding of the procedures
- Demonstrate they could carry out the required tests and checks for the work using specific scenario exercises
- Highlight how to resolve a fault design change or equipment replacement

Learning approach

70% Theory with pro-active scenarios to assist the delegate with understanding the principles of G110 Tester/Lead Tester
30% Practical scenarios applying the G110 procedures
The course has both theory and practical assessments in which an appropriate pass mark must be achieved before a certificate is issued.
On successful completion a new SMTH card will be issued with existing expiry of the SMTH card allowing re-certification to re-occur simultaneously to SMTH Recerts.

Pre-requisites

Delegates must hold a current SMTH certificate including SFI Level 1 or have operational experience in any role where they can demonstrate an equality of competence in signal works testing or works delivery.
